# JUMA’S CYBAR

## Slide 1: Title Slide

Business Name:JUMA’S CYBAR

Tagline: Smart Digital Solutions for Everyone

Business Description: CYBAR is a technology startup focused on providing affordable digital services, basic cybersecurity support, and digital skills training to individuals and small businesses in Kenya.

Founder: JUMA AMEYU DANIEL

Location: Kalobeyei, Kenya

## Slide 2: The Problem

Many individuals and small businesses face challenges when using digital technology.

- Small businesses struggle to establish a strong online presence.
- Many people lack the digital skills needed to use technology effectively.
- Online scams, phishing messages, and account security problems threaten users.
- Professional digital services can be expensive for small businesses.
- Some entrepreneurs do not know how to protect their business information online.

These challenges reduce business growth, customer trust, and the safe use of technology.

## Slide 3: Solution

My cyber will provide affordable, practical, and reliable digital solutions.

My services will include:

- Helping small businesses create websites and online business profiles.
- Providing basic cybersecurity awareness and account protection guidance.
- Training individuals in digital skills.
- Helping businesses improve their online visibility.
- Offering basic technology support and digital consultation.

My aim is to make digital technology easier, safer, and more accessible.

## Slide 4: Target Market

I will target customers who need affordable digital services.

My main customers will be:

- Small and medium-sized businesses.
- Retail shops and local entrepreneurs.
- Students and young people who want to improve their digital skills.
- Freelancers and online workers.
- Community organizations that need technology support.

## Slide 5: Market Opportunity

Kenya's growing use of mobile phones, internet services, digital payments, and online business platforms creates opportunities for digital service providers.

My cyber will focus on customers who need practical technology assistance but may not have the budget to hire large technology companies.

My opportunity is to offer accessible services, personalized support, and affordable packages for individuals and small businesses.

Market research needed: Interview potential customers and compare competitors' prices to estimate the size of the market and validate demand.

## Slide 6: Products and Services

1. Website and Digital Presence Services

Creating simple websites, online profiles, and digital promotional materials for small businesses

2. Cybersecurity Awareness

Teaching customers how to recognize scams, use strong passwords, and protect their accounts.

3. Digital Skills Training

Offering practical lessons in computer use, internet safety, online communication, and digital business tools.

4. Technical Support

Helping customers troubleshoot common software, device setup, and online service problems.

## Slide 7: Business Model

I will generate income by charging customers for services and training.

| Revenue source | How CYBAR earns |
|---|---|
| Website development | A fee for each website project |
| Digital consultation | Charges per consultation |
| Digital skills training | Fees per learner or training session |
| Business support packages | Monthly service subscriptions |
| Cybersecurity awareness workshops | Fees from individuals or organizations |

I will start with affordable service packages and adjust its prices based on customer needs, operating costs, and market research.

## Slide 8: Competitor Analysis

My cyber  will compete with freelance technology professionals, digital marketing agencies, computer training centers, and IT support companies.

| Competitor type | Potential weakness | CYBAR's advantage |
|---|---|---|

| | | |
|---|---|---|
| Freelancers | Services may be limited to one specialty | A range of related digital services |
| Large IT companies | May be costly for small businesses | Affordable packages for smaller customers |
| Training centers | May focus mainly on classroom learning | Practical, customer-focused training |
| Digital agencies | May concentrate on marketing | Digital support combined with online safety education |

Competitive advantage: Affordability, personalized customer service, practical training, and a focus on small businesses.

These advantages will need to be tested through customer feedback and competitor research.

## Slide 9: Marketing and Sales Strategy

My cyber will attract customers through affordable and effective marketing methods.

- Social media: Promote services on Facebook, Instagram, TikTok, and LinkedIn.
- WhatsApp Business: Communicate with customers and share service packages.
- Referrals: Encourage satisfied customers to recommend CYBAR.
- Partnerships: Work with schools, community organizations, and small business groups.
- Demonstrations: Offer introductory digital safety sessions and show examples of completed projects.
- Online portfolio: Display services, customer testimonials, and previous work on a business website.

My goal is to build trust, attract repeat customers, and grow through recommendations.

## Slide 10: Financial Plan

My cyber will begin with a small, manageable operation and expand as revenue increases.

The following figures are illustrative planning estimates in Kenyan shillings (KES), not verified quotations or guaranteed earnings.

| Startup expense | Estimated cost |
|---|---|
| Laptop and accessories | KES 60,000 |
| Internet and software setup | KES 10,000 |
| Website and branding | KES 10,000 |
| Marketing and promotion | KES 10,000 |
| Transport and other expenses | KES 10,000 |
| Total estimated startup cost | KES 100,000 |

Potential monthly revenue target:

| Revenue source | Monthly target |
|---|---|
| 4 website projects at KES 10,000 each | KES 40,000 |
| 10 consultations at KES 1,000 each | KES 10,000 |

| | |
|---|---|
| 10 training participants at KES 1,500 each | KES 15,000 |
| Total target revenue | KES 65,000 |

The revenue target is KES 65,000 per month before operating expenses. Actual income will depend on customer demand, pricing, and the number of projects completed. I will track expenses and calculate profit before making expansion decisions.

# Slide 11: Team and Implementation Plan

Team structure

- Founder/Business Manager: Oversees business planning, customer relationships, and daily operations.
- Web Developer: Builds and maintains websites.
- Digital Skills Trainer: Provides digital literacy and online safety training.
- Technical Support Assistant: Helps customers resolve common technical problems.

At the beginning, one person may handle several roles, with additional team members engaged as the business grows. Qualified specialists will be needed for advanced cybersecurity services.

Implementation timeline

| **Period** | **Main activity** |
|---|---|
| Month 1 | Conduct market research and identify customer needs |
| Month 2 | Set up the business identity, service packages, and portfolio |
| Month 3 | Launch marketing and acquire initial customers |

| | |
|---|---|
| Months 4–6 | Collect feedback, improve services, and build partnerships |
| Months 7–12 | Expand customer reach and introduce additional services |

## Slide 12: Vision, Impact and Call to Action

My vision

To become a trusted digital solutions provider in Kenya, helping individuals and small businesses use technology safely and effectively.

My  mission

To deliver affordable digital services, practical technology training, and online safety awareness to underserved customers.

Expected impact

- Help small businesses strengthen their online presence.
- Improve digital skills and awareness of online risks.
- Create opportunities for technology-related employment.
- Support entrepreneurs in adopting digital tools.
- Encourage safer and more confident participation in the digital economy.

My call to action

My cyber invites potential partners, mentors, customers, and investors to support the development of affordable digital solutions for individuals and small businesses in Kalobeyei.

Together, we can make technology more accessible, useful, and safe.
